The print part didn't really produce what I wanted, but thanks for the effort. Fyi, turning the call log into sample collection assignments to START & SERES is with Molly & La Plata County GIS now.

FYI, Molly has also been tasked with making a task tracking list/ spreadsheet. I'm not sure if Google docs makes the most sense for that or not, but there is power in sharability. She is needing to track well owner contact attempts, sample collected, results provided to well owner. It looks like the water provision is out of our hands, but I expect START will be tasked to track & report that as well. I bet you'll be tracking it by Wednesday, Thursday at the latest.

Hey Dave,

The print spreadsheet has been created in Google Docs and will update each time a new record is processed in your forms. It is going to be hard to print on one page unless we can get the field count down a little.

Thanks

If you could send the list of fluvial wells – parcel addresses to Martin & John, that would be helpful.
